

BEAT

THE COLD

with PIP weatherproof jackets and coats

STAY WARM. STAY DRY.

ACS has the new styles of coats and jackets from PIP that provide the protection and versatility workers need to stay warm and dry.

PIP TRILAMINATE JACKET Has an inner grid fleece lining that reduces fabric weight while increasing warmth. Breathability and wicking efficiency make this jacket water resistant and wind proof.

PIP RIPSTOP BOMBER JACKET Ergonomically designed with a removable fleece liner for versatility, comfort, and durability.

PIP BOMBER JACKET Sewn in high loft insulation keeps workers warm while providing breathability so moisture doesn't get trapped against the skin.
